Where Traditional Windows Meet Modern Day Needs

Awning Windows

Character, style,
durability and
performance that
lasts

FEATURES	BENEFITS
Provides polymer corner protectors	Safety Edges that protect while functioning
Continuous hook hinge at top	Acts as a hood to prevent wind, rain, dust when open
Optional lockable geared winders	Enables smooth and trouble free operation even with screens
Traditional solid sash	Giving heritage appearance
Full joint sealing	Maximises weather proofing performance
52mm width frame	Structure strength and performance that accommodates up to 300km/hr of wind pressure.
Takes up to 10.38mm laminate glass	Enhances acoustic sound proofing performance
Accommodates double glazed units	Enhanced thermal performance for climate control plus added strength and safety
Accommodates toughened glass	Added strength and safety
Accommodates specifically selected glass	Substantially stronger than normal 3mm glass. Significant reduction in UV ray entry, direct energy entry and glare
Positive locking action	Providing maximum security and safety
Accommodates colonial and federation bars	Wider range of aesthetic looks to suit any design criteria
Compatible with our other windows products	Large variety of combinations making design selection easy
Accommodates custom fitted screens	Increased safety and insect protection. Removable from inside only for ease of cleaning
Replaceable weather seals	Ease of maintenance for years of service and good looks
Engineered polymer hardware	Increased strength and security. Anti-corrosive for longer life of trouble free use
Baked powder coat finish	Increased resistance to scratching. Increased colour retention. Maintains gloss finish for longer periods. Reduced 'chalking' and fading
Aluminium frames	Manufactured for maximum strength and durability
Vinyl seals	Offers maximum performance for many years
Unlimited frame colours available	Flexibility and personal choice
Australian Design Award winner	Recognised design excellence
