Integrity™ PIVOTING SHOWER DOOR SYSTEMS – FEATURES AND BENEFITS

Advanced Sill Design

Contoured fully enclosed twin-tiered sill design directs water run-off into shower base. Gasket sealing system ensures maximum water resistance. Low profile design is foot-friendly, unobtrusive and reduces external splashing for a cleaner, drier and safer bathroom.

Water Resistance

4mm spacing at the sill significantly improves water resistance and eliminates splashing.

Integrated Fixed Panel

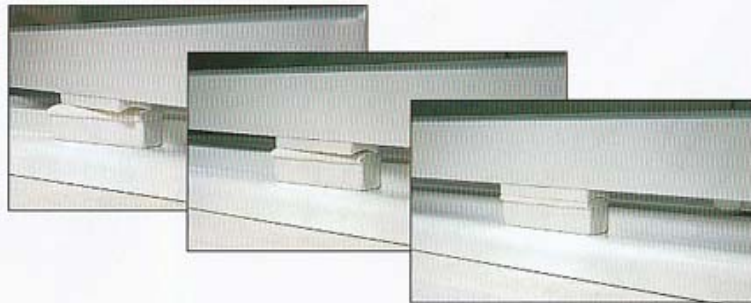

Fixed panels (where required) are glazed directly into the outer frame, minimising the potential for residue accumulation.

Patented Pivot Mechanism*

Utilising a stainless steel pivot pin, this mechanism features a 'positive close' low friction design, providing the benefit of whisper quiet and trouble free operation.

The 'lowering' effect of the design automatically reduces sill gap on door closure, which further assists with elimination of external splashing and improved water resistance.

Low Maintenance

Smooth contoured profiles minimise soap and residue accumulation and the need for cleaning.

Handles

A complementary range of handles are available in your choice of either clear acrylic or full length continuous double-handle stiles which are user friendly and safe for all members of the family.

Contoured Designs

This award winning **Australian Design Mark** product reflects the latest in design aesthetics and technology.

Componentry

Component and design features combine to provide convenience and colour co-ordination.

- Snap caps
- Patented pivot mechanism
- Anti-bacterial frost and colour matched glazing vinyl.

Design Flexibility

Integrity Systems can be designed for installation into most bathrooms. Ask your distributor for advice on a style to suit your needs.

Safety

Integrity Systems are glazed to comply with the requirements of Australian Standards AS 2208 and AS 1288.

Colour Selection

Integrity Systems are available in a range of stylish colours to suit your decor. Special colours available on request.

Please note that brochure printing processes may not reproduce the actual depth, vibrancy and tones of these standard colours. Consult your distributor for final colour selection.
