# Visionarii – Window and Door Styles

## Visionarii Tilt Turn

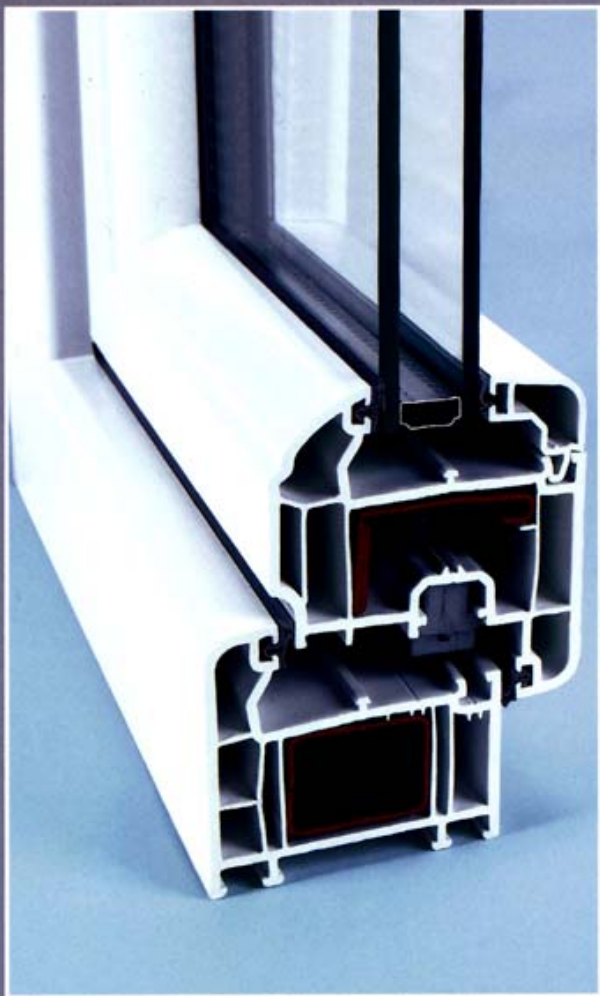

Visionarii's impressive tilt and turn mechanism offers a highly secure ventilation option, engineered to allow the ingress of cool air while simultaneously expelling warm air from your home.

Tilt and turn system for design flexibility and optimum functionality.

# A Window is just a window...isn't it?

The Visionarii multi-channel and double-glazed panes are specifically designed for optimum energy performance in Australian conditions.

## **Significant energy savings**

37% of household energy is lost through windows. Visionarii windows perform 4½ times better than traditional aluminium alternatives.

## **Excellent sound reduction**

Outside noise is reduced by up to eight times between 33dB to 43dB.

## **Superior weather resistance**

Visionarii UPVC windows are rated to withstand the highest UV exposure and extreme temperatures 82°C with no fading or change to its appearance or performance.

## **Storm-friendly performance**

Visionarii's specialized corner welding and patented double-sealed recyclable gasket forms an impenetrable barrier against the elements.

## **Excellent fire proofing**

All materials used by Visionarii are non-combustible and self-extinguishing while complying to manufacturing standard DIN 16 830.

## **Completely corrosion resistant**

Seaside locations or areas that experience high humidity are safe from damage or any changes in the appearance of Visionarii windows.

**Thermo-image cross section of a Visionarii window frame and glazing during heat transfer testing.**

# Visionarii Windows UPVC

- Unplasticised Poly Vinyl Chloride

## Green and clean

- Made primarily from salt, PVC is the widest used plastic in the healthcare sector.
- From blood bags to catheters, PVC is chosen for its highly-safe sanitary qualities, long life cycle, consistent manufacturing quality and extreme robustness.
- Visionarii windows are manufactured completely lead-free in accordance with the ISO 900-2000 Quality Guarantee Certificate.

## Lowering global energy costs

- The manufacture of Visionarii windows uses three times less energy than its aluminium counterparts and two times less than that of timber.
- Visionarii windows are certified 100% recyclable up to seven times, delivering a positive impact on the ominous global landfill problem.

Fully welded mitre joints prevent wind, water, dust and insects entering.

Door and window furniture factory fitted for ease of installation.

# Visionarii have the solutions

Architects, builders, landlords and home owners are required to reach increasingly stringent building design objectives.

Visionarii windows provide real solutions to the challenges now faced in the Australian building industry.

- Energy efficiency
- Environmental sustainability
- Recyclability
- Enduring design
- Acoustic efficiency
- Star Ratings
- Durability
- Ergonomics
- Measurable savings on running costs
